

I am responding to your proposal to give priority to Low Power FM station over FM translator services.

I have had opportunities on many occasions to benefit from radio programming transmitted over FM translators.

Currently I listen to FM 91.3 and FM 106.3 transmitted from both San Antonio and San Marcos.

This station provides music, community information, and inspirational messages that have been very helpful in my life.

There are very few stations in our area that transmit positive music and messages as these stations do.

These stations provide a great community service by encouraging citizens to be involved in their community and sponsors concerts which have a positive message for young people.

I believe the community would be hurt by allowing the LPFM stations to have priority over existing translator services.

Many people in this community have paid to support these stations, and have done so because there is so little positive, inspirational stations available to us.

Thank you for your consideration.
